Forecast for Friday 23 Jul 2021

Weather: Dry overnight, perhaps some mist forming in valleys and low cloud may possibly creep in from the east coast over some of the eastern slopes. Any low cloud tending to burn away quite quickly in the morning leaving another sunny and warm day. There is the chance of an isolated heavy shower in the afternoon. Possibly some low cloud spreading west from the coasts once again in the evening.

Chance of cloud free mountain/hill tops above 700m: 90%, perhaps some patchy low cloud in the morning and evening especially for eastern ranges.

Visibility: Generally good or very good but around dawn there may be patchy or scattered low cloud from 600ft for more eastern hills. This will clear readily during the morning but may reform during the evening. Otherwise it may be hazy at times.
